

New Year Message (2014) **From the Desk of Chairman cum Managing Director**

My Dear Colleagues,

An eventful year has just passed and we have stepped into a new one. Welcoming the year 2014, I wish all the family members of Hindustan Copper a Happy, Healthy & Prosperous year 2014.

The year ahead is expected to throw quite a few challenges and opportunities before us. While bracing for the challenges we need to create opportunities to enhance the shareholder's value.

While primary focus will be to enhance the production and increase the capacity utilization of our assets, we will also have to lay greater stress to increase the productivity of the men and machinery to offset the rising cost of production. In the coming year the Company will endeavour to continuously explore opportunities for growth to by creating new verticals. Value addition though enhanced by product recovery will be one of our thrust areas.

We are nearing the last mile stone approval of the environment & forest clearances of our mine expansion projects and our capex expenditure will go up substantially in the 2014. It is expected that the work at site will commence for Malanjkhand, Chapri-Sidheswar & Rakha mine projects shortly.

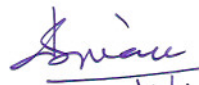

It is important that we believe in ourselves, have faith in our capabilities and the courage to carry out our convictions. Like every drop that makes an ocean, each one of us has within ourselves, the capability to make a difference to our organization.

Our businesses are also influenced by fluctuation of LME copper prices & exchange rates. Over the last year Copper prices have wildly fluctuated in the global market. The trend may continue in 2014 as well.

We, as a Company, have shown exemplary strength in the past to overcome all the odds. So I am sure that, come what may, we will do it in future. Our commitment will see us through all headwinds. And succeed we must. As a new unified team we must work together to build HCL which is stronger and rewarding to all its stakeholders.

May 2014 bring us all Good Times and Prosperity!
