

Press Release

Hindustan Copper celebrates its Foundation Day

Kolkata, November 09, 2016

Hindustan Copper Limited fondly celebrated its Foundation Day today. The Public Sector Enterprise was established on 9th November 1967 to make the country self-reliant in Copper. At present, Govt. of India holding in the Company is 82.95%.

With all the operating mining leases of Copper ore in India, HCL remains the only vertically integrated Copper producing Company in the country.

Conferred with the status of Miniratna (Category – I) in 2008, the Company's cutting edge lies in harnessing and exploiting India's Copper mineral resources for the benefit of the nation.

The Company has five operating units at Khetri (Rajasthan), Malanjkhand (Madhya Pradesh), Ghatsila (Jharkhand) Talaja (Maharashtra) and Bharuch (Gujarat).

A Prabhat Pheri was organized in the morning for all in the Units. Several competitions were held amongst school children and the employees in the course of the day.

Fruits were distributed to inmates of local hospitals and cultural events were organized.

Special cleanliness drive was taken up in the Units. Also, the Foundation Day of HCL was marked as Safety Awareness Day and a training session on safety precautions was held.

It has been a long journey for HCL since the day of inception. Khetri mine in Rajasthan was the first project to be handed over to the Company in 1967. Subsequently, smelting and refining facilities were added.

In September 1972, the Govt. of India nationalized Indian Copper Corporation Ltd, established by a British Company in 1930, and merged it with HCL as Indian Copper Complex. Today it falls in the state of Jharkhand.

Malanjkhand Copper Project in Madhya Pradesh was established in 1982. Initial project was set up by Hindustan Copper Ltd to exploit the Copper ore through an open pit mine. In 2015, underground mine expansion was initiated and it is soon to be the largest base metal mine in the country.

Talaja Copper Project, Maharashtra, was set up in December 1989, based on technology sourced from Southwire, USA to produce copper wire rods for the first time in the country.

Jhagadia Copper Limited in Gujarat was taken over by HCL in April 2015 and was rechristened as Gujarat Copper Project (GCP), the fifth Unit of the Company.

Re-starting of Jhagadia Copper Plant, besides enhancing production capacity of HCL, will also give boost to recycling of Copper including processing of e-scrap in an environment-friendly manner in the country.

HCL products are acknowledged for their superior quality and reliability. The main products are Copper Concentrate, Copper Cathodes and Continuous Cast Copper Rods.

The Company also offers allied by-products like Nickel Cathode, Anode Slime (containing precious metals), Sulphuric Acid, and Copper Sulphate etc.

In pursuit of its Corporate Vision, HCL has currently expanded its horizon and has embarked on a well laid-out growth path across all the value chain of copper manufacturing.

HCL plays a catalytic role in the sustainable socio-economic development in the region where its mines and plants are located, aiming at a holistic regional development. The Company during its journey has been instrumental in uplifting the local economy where its Units are established and has generated local employment.

The Company has taken up several projects for Sustainable Development and Corporate Social Responsibility (CSR) through activities like promoting preventive health care and sanitation and making available safe drinking water facility, promoting education and employment enhancing vocational skills and livelihood opportunities, promoting women empowerment, promoting environmental sustainability, promoting sports and various rural development projects.

The Company has actively participated in Swachh Bharat Mission and has constructed/repaired 203 toilets covering twelve districts of three states namely, Jharkhand, Madhya Pradesh and Rajasthan. The Company is actively participating in the ODF (Open Defecation Free) villages mission and plans to build 1390 toilets covering 15 villages.
