

Safety Plan

Overview

Safety and protection of employees and installations receive highest priority. HCL's policy aims at the objective of eliminating physical, chemical, bio-medical and mechanical hazards or exposures which may result in personal injuries or illnesses, property damage, fires, explosions, hazardous substance discharges, security losses and other losses. We believe a "safe work place is only a productive work place"

The company has well equipped safety departments at each of the units. These departments are manned by experienced professionals.

HCL has won several safety awards during the past five years. Efforts will be continued for achieving further excellence in safety standards.

Intensive training programs and workshops are planned for workmen and executives at all levels. These are regularly conducted and repeated with a view to creating and maintaining safety consciousness at all levels, all the times.

Safety Policy

HCL assigns high importance to safety as an essential component in every spare of its activities, in order to improve the well-being of employees" performance and the growth of the Company.

Objectives

- To give highest priority to safety, in selection of plants & equipment's, erection and commissioning activities
- To develop operating manuals for each process, with safety provisions duly highlighted
- To provide safety training to employees and contract workers.
- To inculcate safety culture in the organization where safety is manifested in each employees' mind, thought and expression
- To strictly adhere to the safety related laws, rules, procedures framed by the Govt. and
- To take appropriate action in case of violation
- To identify and eliminate risk related process by carrying out safety audits
- To ensure, prepare and update Disaster Management Strategies and organize mock drills to keep the concerned personnel in preparedness.

Safety Forum

Issues related to safety are discussed at the pit safety committee / shop Council meetings held in various departments, Joint Councils at unit level and Joint Consultative Committee of HCL. Based on the deliberations of these meetings, safety measures are undertaken and implemented on top priority.

The Company has also arranged Tripartite Safety Committee exclusively to discuss safety aspects. This Committee has representatives of Trade Unions and Management, as well as of the Directorate General of Mines & Safety, Govt. of India.

Occupational Safety & Health (OSH) services have been established at the Units and initial & periodical medical examination (IME & PME, PPME) are being done for employees working in mines and plants. Medical officers of the Company will be exposed to latest technique for detection of the occupational disease due to specific exposure as per ILO Conventions and Recommendations.

Safety plans

- To improve further the standards of safety, the following steps will be taken:
 - o Improvement in general awareness among the employees in accident- and accident-prone areas & times.
 - o Improvement in working conditions by introducing underground vehicle management and communication system
 - o Strengthen rescue & fire services in mines & plants.
 - o Introduction of mining software for accurate processing & analysis of accident data.
 - o Zero Accident Programme (ZAP) to be achieved
- It is planned to formulate a comprehensive occupational health and safety management system (OHSMS). Occupational Health and Safety management of the Company is to be with the OHSAS-18001 standards. Obtaining OHSAS 18001 certificates for selected plants/units of the Company will be prioritized
