

Sustainable Development

HCL is committed to long term, mutually beneficial partnership between communities, Government & stake holders. Sustainable development frame work aims at achieving resource efficiency, business viability and environment stewardship around development of affected communities. Company is committed to create sound and eco-friendly environment for sustainable development at all production projects. Company approach will be proactive instead of compliance approach.

Corporate policy framework for sustainable development is guided by the principles laid down by International Council on Mining & Minerals (ICMM). The ten principle of ICMM for sustainable development are given below:

- i. Implement and maintain ethical business practices and sound systems of corporate governance.
- ii. Integrate sustainable development considerations within the corporate decision-making process.
- iii. Uphold fundamental human rights and respect cultures, customs and values in dealings with employees and others who are affected by our activities.
- iv. Implement risk management strategies based on valid data and sound science.
- v. Seek continual improvement of our health and safety performance
- vi. Seek continual improvement of our environmental performance
- vii. .Contribute to conservation of biodiversity and integrated approaches to land use planning
- viii. .Facilitate and encourage responsible product design, use, re-use, recycling and disposal of our products
- ix. Contribute to the social, economic and institutional development of the communities in which we operate
- x. Implement effective and transparent engagement, communication and independently verified reporting arrangements with our stakeholders

Elements of Sustainability

- i. Acknowledge the importance of corporate accountability – economic, environmental and social
- ii. Establish mechanisms to monitor and assess corporate practices
- iii. Strengthen public access to information

- iv. Send the right messages
- v. Empower local communities
- vi. Make clean production the required standard

Sustainability Process

Imperatives for Sustainability Reporting

1. Keeping stakeholders informed and assured of sustainable development by the mining industry
2. Sending right messages to the stakeholders so that business continuity is maintained and political, regulatory and social risks
3. Keeping processes of compliance with the compliance with standards of sustainability well established – from data gathering to analysis and reporting.
4. Brand building which helps improving economic returns; retaining talent, customers and suppliers; and improving access to finance.

Table 23: Stakeholders' Concern for Sustainability

Stakeholder	Sustainability Concerns
Customers	Unhindered raw material supplies
Suppliers	Continuity of business relationships
Investors	Cash flows and returns
Regulatory bodies	Safety, environment, occupational health, climate change
Government	Employment, revenues and taxes
Society	Standard of living
Employees	Employment

Three Key Aspects of Sustainability Concern

Three Aspects of Sustainability

Sustainable development is imperative in a world of growing populations and finite natural resources and ecological

pressure caused by widespread poverty, increasing environmental degradation, and climate change.
